SUMMARY

Full Stack MERN Developer with 1+ year of hands-on experience building and deploying web applications with React.js, Node.js, Express.js and MongoDB. Built three live projects featuring JWT and Google OAuth authentication, Razorpay payments, AWS deployment and AI features using the Gemini and OpenRouter APIs.

SKILLS

Languages: JavaScript, HTML, CSS
Frontend: React.js, Redux Toolkit, Context API, TanStack React Query, React Router, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, Joi validation, Winston
Databases: MongoDB, Mongoose, MongoDB Atlas, Redis
Auth & Security: JWT, Google OAuth, Bcrypt, Helmet, Rate Limiting, Role-Based Access Control
Cloud & Deployment: AWS (EC2, S3), Nginx, PM2, Vercel, Render, Cloudinary
Integrations: Razorpay, Google Gemini API, OpenRouter API
Tools: Git, GitHub, Postman

EXPERIENCE

Full Stack Developer Trainee | Mentor Bro | Aug 2025 - Present

- Built and deployed full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Worked as a backend developer on the SpokeUp project, designing and implementing RESTful APIs with Node.js and Express.
- Implemented authentication and role-based access control using JWT and custom middleware.
- Integrated third-party services including payment gateways and cloud storage.

PROJECTS

ShopEase - Full Stack E-Commerce Platform

React.js, Redux Toolkit, Node.js, Express.js, MongoDB, AWS, Razorpay, OpenRouter, JWT, Google OAuth
Live: shopease-frontend-vyasan.s3-website-us-east-1.amazonaws.com | GitHub: github.com/vyasan-6-6/ShopEase-Ecom

- Built a full-stack MERN e-commerce platform with separate Customer and Admin portals, JWT authentication, role-based authorization, cart, wishlist and order management, plus an admin dashboard with PDF sales reports, coupon, banner and inventory management.
- Designed 20+ MongoDB schemas with Mongoose and Joi validation, using indexing and aggregation pipelines ($lookup, $group, $match, $unwind) for reporting.
- Integrated Razorpay and Cash on Delivery with HMAC SHA-256 webhook verification, automated refunds and an in-app wallet.
- Built an AI shopping assistant with the OpenRouter API for product recommendations, order tracking, cancellations and returns.
- Secured the app with Google OAuth, Bcrypt, Helmet, rate limiting and Joi validation; deployed the backend on AWS EC2 with PM2 and Nginx, static assets on S3, with Winston logging.

Mini E-Commerce Platform

React.js, Context API, Tailwind CSS, Node.js, Express.js, MongoDB Atlas, Cloudinary, Vercel, Render
Live: mini-mern-ecommerce-app.vercel.app | GitHub: github.com/vyasan-6-6/MINI-MERN-ECOMMERCE-APP

- Built a responsive full-stack MERN e-commerce app with React.js and Tailwind CSS v4.
- Managed product search, category filtering and pagination using React Context API and useReducer.
- Integrated Cloudinary for cloud image uploads, removing reliance on local server storage.
- Designed MongoDB Atlas schemas with case-insensitive unique indexes; deployed the frontend on Vercel and the backend on Render.

Shortcut Pro - AI-Powered URL Shortener & Click Analytics

React.js, TanStack React Query, React Router, Node.js, Express.js, MongoDB, JWT, Google Gemini API
Live: url-shortener-pro-eta.vercel.app | GitHub: github.com/vyasan-6-6/Url-shortener-pro

- Built a full-stack MERN URL shortener with JWT authentication, custom aliases, click tracking, API rate limiting and centralized async error handling.
- Integrated the Google Gemini API for URL safety analysis, alias suggestions and traffic insights, with fallback handling.
- Built an analytics dashboard showing visitor activity, browser, referrer and anonymized IP data.
- Improved frontend performance with React.lazy, Suspense and TanStack React Query caching; organized logic with custom hooks and a service layer.
